

SCREW & STRAP INSTALLATION GUIDE

1. Insert the tip of the screw into the ground. Pressing downward, rotate the screw clockwise using a 1-inch Ratchet wrench, Socket wrench or portable Impact wrench. Fully insert the screw until the collar is flush to the ground.
2. Attach the steel clip of Tie-Down strap to the screws webbing loop.
3. Unlock and open the strap tensioner lever by pressing the release button on the lever downward.
4. Attach the S-Hooks to the aircraft tie-down points.
5. Pull the front webbing strap downward to tension and remove slack.
6. Fully **Close and Lock** the strap tensioner lever. The lock will click in-place when fully engaged. Closing and locking the strap tensioner will shorten and tighten the strap length by approximately one inch.
