PRO 3600 Serial Port:

- The PRO 3600 has an RS-232 compatible serial port for angle readout. The angle is output in ASCII in response to a HI signal on the REQ line. The T&B Ansley 609-1027 connector on the back of the PRO 3600 mates with industry standard cables. Angles are calculated and output every 533msec (8/15) second.

Pin Assignments:

Pin Number	Signal	I/O	Description
1	GND	N/A	Signal Ground
2	TD	Output	Transmits serial data bits (9600 baud, 1stop bit,no parity)
5	BATT+	Input	RS-232 input; high signal requests data output
9	BATT+	Either	Power input, or output if battery is installed in protractor
3,4,6,7,8,10			Not in Use

DC Electrical Characteristics:

Parameter	Minimum	Nominal	Maximum	Unit
REQ input low voltage	-25	-	0.4	volts
REQ input high voltage	2.4	-	25	volts
REQ input resistance	3	5	7	kohm
TD output low voltage	-	-5	-	volts
TD output high voltage	-	+5	-	volts
BATT+ input voltage	4.25	9	10	volts

Angle Output Format:

The ASCII angle output may be read by a computer, or may directly drive a printer. Measured angles cover a full 360 deg. range and the readout is between -180 deg. and +180 deg.
