

Watch a six-minute video that explains and demonstrates diluting Release Ultra Concentrate

Important: To maximize the performance of Release Ultra Concentrate, dilute with purified, distilled, deionized, or reverse osmosis water.

STEP 1: CHOOSE YOUR CLEANING TASK

STEP 2: MIX THE RATIO

STEP 3: CLEAN!

	1 Gallon Container	32 oz Container	20 oz Container
<p>Heavy – 1:20</p> <ul style="list-style-type: none"> • Carbon/Turbine soot • Caked on bugs • Oil/grease • Tree Sap • Bird droppings • Heavy cleaning 	<p>6.4 oz or 13 pumps</p>	<p>1.6 oz or 3 pumps</p>	<p>1.0 oz or 2 pumps</p>
<p>Moderate – 1:40</p> <ul style="list-style-type: none"> • Dirt/dust • Fresh bugs • Mold, mildew, pollen • Grime • General cleaning 	<p>3.2 oz or 7 pumps</p>	<p>0.8 oz or 2 pumps</p>	<p>0.5 oz or 1 pump</p>
<p>Light – 1:100</p> <ul style="list-style-type: none"> • Fingerprints • Smudges • Dust • Sunscreen • Light cleaning 	<p>1.3 oz or 2 1/2 pumps</p>	<p>0.3 oz or 1/2 pump</p>	<p>0.2 oz or 1/2 pump</p>

Release will never hurt the surface, regardless of what dilution ratio at which you use it. Use Release Ultra Concentrate to create an effective cleaner for each of your diverse everyday cleaning needs.

RELEASE® ULTRA CONCENTRATE

Release Ultra is a technologically advanced cleaner that uses associative chemistry. It is designed to maximize cleaning effectiveness and reduce the total cost of cleaning. It is an ultra concentrated formula that contains almost no water, saving you money. Release Ultra Concentrate is intended to be diluted to clean the job at hand.

FEATURES

- Ultra concentrated for maximum value
- Reduced storage space and shipping and handling costs – not shipping water
- Economical to use as a high-performance cleaner for all industries
- Meets specifications of Boeing, Douglas, and AMS testing
- Approved for use by major aircraft manufacturers
- Used by consumers and businesses in all industries

Tip: The “1” in 1:20 means 1 part Ultra Concentrate, and the “20” means 20 parts filtered water.

Tip: When applying with a foaming sprayer, use a 1:20 ratio with the dry foam tip for best results.

Tip: Diluting is the process of adding a solvent, like water, to a concentrated liquid to make a ready-to-use cleaner.

Tip: Release is an associative technology cleaner. The longer Release has to sit and associate with the soil, the easier it will come off. Some agitation may be required for heavy soils.

* Pumps for gallon jug hand pump

NOTICE: Release will associate with the oil on your skin and remove the oil causing dryness of the skin. For that reason, it is recommended to wear gloves when you plan for Release to be in contact with skin for extended periods of time.
